Key features:

- Create state-of-the-art technical reports from multiphysics simulation results
- Capture transient results and playback them at varying speed, step by step through key events
- Highly compressed 3D Geometry Representation using PRC-HCT encoding technology
- PDF/Engineering ISO 24517-1:2008 Compliance option, with PDF XML Metadata Keywords
- Insert 3D into existing PDF documents containing text, background logos, tables, specifications
